WHAT'S WRONG WITH MY TOMATOES?

presented by UConn's Joan Allen

MONDAY, MAY 22, 2017
7pm, Plainfield Town Hall
Free & Open to the Public

Tomatoes are a popular and widely grown vegetable in the home garden. If you grow them, you've probably had some experience with a few tomato health problems. Learn about the common and important pests, diseases and disorders of tomatoes, how to recognize them, and how to manage or prevent them using sustainable practices.

The Presenter: Joan Allen, assistant extension educator at the University of Connecticut, runs the UConn Plant Diagnostic Laboratory on the Storrs campus. She specializes in plant diseases and pests, integrated pest management, organic plant disease and pest management, vegetables, invasive plant pests and diseases, and related issues.
